EDUCATION:

Rochester Institute of Technology, Rochester, NY — May 2022

BS: Game Design and Development, Minor: Music & Technology — **GPA: 3.98**

SKILLS:

Tools: Visual Studio Code, Git, React, pnpm, Claude Fable 5, ChatGPT Codex, Unity, Ableton Live 11, Unreal Engine 4

Languages: TypeScript, JavaScript, C#, Java, HTML5, CSS, C++, Python

WORK EXPERIENCE:

MahiGaming — June 2022 – March 2025

Game Developer | Full-time — Deerfield Beach, FL

- Led client-facing technical development in cross-functional teams, creating high-engagement games with cross-browser compatibility within tight two-month timelines
- Collaborated with project managers to deconstruct game architecture into Jira tickets with defined task requirements, timeline estimates, and dependencies between features
- Applied object pooling to develop a slot game precognition feature where fireballs dynamically foreshadow upcoming paylines
- Utilized TypeScript and ReactFlow to optimize slot game win presentation handling by creating an interpolation driver node that can be hooked up in a Blueprint-like flowgraph
- Addressed and iterated on user feedback to improve interfacing experiences across the company by adding flowgraph navigation to an in-house game engine
- Resolved live issues in a timely manner to ensure games maintained high uptime for slot game operators

Mustard Software — May 2026 – Present

Software Developer | Part-time — Remote

- Develop and maintain front-end features for a growing, multi-tenant SaaS platform using React and TypeScript, supporting local businesses across an expanding client base
- Implemented a comprehensive set of filters for a private travel agency client's internal trip and reservation workflows, with support for multi-select filtering
- Built platform functionality for activity logs and roadmap management, including note revisions and displaying roadmap item creators, to support internal workflows and future CRM clients.

Jewish Federation at Palm Beach County — March 2026 – Present

Help Desk Analyst | Full-time — West Palm Beach, FL

- Developed PowerShell scripts to automate employee data auditing and bulk Active Directory attribute updates, reducing a multi-day manual process to a single execution
- Identified and eliminated a repetitive manual onboarding/offboarding process by implementing a Freshservice Workflow Automator workflow that automatically generates onboarding and offboarding tasks, removing the need to recreate and reattach updated checklist documents for progress tracking
